WORK EXPERIENCE

Paycom

Senior Software Developer (PHP 8, JavaScript, TypeScript, React, MySQL)
Software Developer

Irving, TX

June 2024 - Present

Dec 2022 - June 2024

- Architected MVC service for asynchronously updating employees across 1000+ linked enterprise clients
 - Queued long-running background jobs for replicating user settings across distributed client families
 - Designed normalized MySQL tables to efficiently store customer data and organize sync preferences
 - Planned technical approach, specced JIRA tickets, and coordinated release with product owners
- Established automated unit testing for customer-facing React application handling customer settings
 - Implemented initial unit test suite with coverage reporting using JavaScript, Jest, Enzyme, and Cobertura
 - Configured GitLab CI/CD pipeline to automatically run tests and output reports on commits to every branch
- Streamlined system tutorial assignments in the user creation workflow for 7500 new client users per month
- Built audit logging responsible for 10,000+ weekly client two factor authentication updates to a MySQL table
- Refactored core sections of legacy user access calculation to their MVC equivalents for large client support
- Introduced developer team procedural updates. Led spec walkthroughs, bug hunts, and a new code review process
- Mentored, pair programmed, and served as point of contact for newer team members to accelerate their learning

Rev

Software Engineer II (C#, TypeScript, React, MS SQL Server)
Software Engineer I

Austin, TX

Oct 2020 - Oct 2022

Aug 2019 - Oct 2020

- Led overhaul of order special instructions with updated C# data models and new TypeScript React components. Surveyed freelancers responded to the redesign with over a 95% positive satisfaction rate
- Worked directly with project lead to build, launch, and maintain sales tax collection for US customers
 - Revised C# order placement logic to levy sales tax and generate SQL records for all desktop orders
 - Created tax exemption page with React and a RESTful API, processing 100+ applications within a week
 - Developed address suggestion and autocompletion React component using the Google Maps JavaScript API
- Facilitated microservice creation using C#, GraphQL, and AWS DynamoDb to power marketplace pricing
- Migrated customer prepayment flows in C# to use secure, single-use credit card tokens from payment processor
- Improved order tracking page accuracy by adding delivery estimates based on historical data pulled with SQL
- Mentored and led code reviews for intern over 3 months to support their onboarding experience and learning

SKILLS

Languages

C#, JavaScript, TypeScript, PHP, SQL, HTML/CSS

Frameworks & Libraries

React, .NET, Jest, NUnit, PHPUnit, jQuery

Tools & Technologies

Git, Docker, Apache Kafka, Splunk, Node.js, npm

EDUCATION

The University of Texas at Austin

Bachelor of Science in Computer Science

May 2019

Graduated with High Honors
